Plastics have outgrown most man-made materials and have long been under environmental scrutiny. However, robust global information, particularly about their end-of-life fate, is lacking. By identifying and synthesizing dispersed data on production, use, and end-of-life management of polymer resins, synthetic fibers, and additives, we present the first global analysis of all mass-produced ...

Generic term used in the case of polymeric material that may contain other substances to improve performance or reduce costs.. Note 1: The use of this term instead of polymer is a source of confusion and thus is not recommended.. Note 2: This term is used in polymer engineering for materials often compounded that can be processed by flow.
