Software testing is an investigation conducted to provide stakeholders with information about the quality of the software product or service under test. Software testing can also provide an objective, independent view of the software to allow the business to appreciate and understand the risks of software implementation.

Software testing - Wikipedia

In this comprehensive beginners guide to big data testing, we cover concepts related to testing of big data applications. This tutorial is ideal for software testers and anyone else who wants to understand big data testing but is completely new to the field.
