

demand outstrips supply the pdf

In microeconomics, supply and demand is an economic model of price determination in a market. It postulates that, holding all else equal, in a competitive market, the unit price for a particular good, or other traded item such as labor or liquid financial assets, will vary until it settles at a point where the quantity demanded (at the current price) will equal the quantity supplied (at the ...

Water resources are natural resources of water that are potentially useful. Uses of water include agricultural, industrial, household, recreational and environmental activities. All living things require water to grow and reproduce. 97% of the water on the Earth is salt water and only three percent is fresh water; slightly over two thirds of this is frozen in glaciers and polar ice caps.

Inflation is defined as a rise in the general price level. In other words, prices of many goods and services such as housing, apparel, food, transportation, and fuel must be increasing in order for inflation to occur in the overall economy. If prices of just a few types of goods or services are ...
