Introduction Biological treatment is an important and integral part of any wastewater treatment plant that treats wastewater from either municipality or industry ...

### **Biological Wastewater Treatment**

The anaerobic digestion of source-sorted organic household waste was examined. High methane yield was produced using batch assays up to 0.49 NLCH 4 /gVS.. Different start-up strategies of fed-batch reactors were evaluated.

### **Process performance and modelling of anaerobic digestion**

Nicotinamide adenine dinucleotide (NAD) is a cofactor found in all living cells. The compound is a dinucleotide, because it consists of two nucleotides joined through their phosphate groups. One nucleotide contains an adenine nucleobase and the other nicotinamide. Nicotinamide adenine dinucleotide exists in two forms: an oxidized and reduced form abbreviated as NAD<sup>+</sup> and NADH respectively.

Ecology (from Greek: *oikos*, "house", or "environment"; *-logia*, "study of") is the branch of biology which studies the interactions among organisms and their environment. Objects of study include interactions of organisms with each other and with abiotic components of their environment. Topics of interest include the biodiversity, distribution, biomass, and populations of organisms ...

Energy is a critical issue for Africa, where large number of people do not have access to energy. Energy recovery from waste can play a role in minimising the impact of Municipal Solid Waste (MSW) on the environment with the additional benefit of providing a local source of energy.

### **Evaluation of energy potential of Municipal Solid Waste**

ABSTRACT. Recent developments in molecular methods have revolutionized the detection and characterization of microorganisms in a broad range of medical diagnostic fields, including virology, mycology, parasitology, microbiology and dentistry.

1. INTRODUCTION - OVERVIEW - Biology as a science deals with the origin, history, process, and physical characteristics, of plants and animals: it includes botany, and zoology. A study of biology includes the study of the chemical basis of living organisms, DNA. Other related sciences include microbiology and organic

chemistry.

Endurance training involves manipulation of intensity, duration, and frequency of training sessions. The relative impact of short, high-intensity training versus longer, slower distance training has been studied and debated for decades among athletes, coaches, and scientists. Currently, the popularity pendulum has swung towards high-intensity interval training.
