Digital transformation means far more than a customer-focused technology transformation. In reality, it represents end-to-end business transformation as organizations establish change as a core competency.

The Agile Digital Transformation Roadmap Poster | Intellyx

A digital signal processor (DSP) is a specialized microprocessor (or a SIP block), with its architecture optimized for the operational needs of digital signal processing.. The goal of DSP is usually to measure, filter or compress continuous real-world analog signals. Most general-purpose microprocessors can also execute digital signal processing algorithms successfully, but may not be able to ...
