

dislocation density function dynamics pdf

The development of advanced lightweight steels with superior mechanical properties is the ultimate goal for structural applications in many industrial sectors, in particular in the automotive industry.

TRIPLEX Steels - Dierk Raabe. com

Thermoelectric materials hold the promise of converting waste heat into electricity. The challenge is to develop high-efficiency materials that are not too expensive. Kim et al. suggest a pathway for developing inexpensive thermoelectrics. They show a dramatic improvement of efficiency in bismuth telluride samples by quickly squeezing out excess liquid during compaction.

Dense dislocation arrays embedded in grain boundaries for

Martindale's Calculators On-Line Center: Materials

Molybdenum disulfide (MoS₂) thin-film transistors were fabricated with ion gel gate dielectrics. These thin-film transistors exhibited excellent band transport with a low threshold voltage (<1 V), high mobility (12.5 cm²/(V·s)) and a high on/off current ratio (10⁵). Furthermore, the MoS₂ transistors exhibited remarkably high mechanical flexibility, and no degradation in the electrical ...

Highly Flexible MoS₂ Thin-Film Transistors with Ion Gel

Unit cell. Crystal structure is described in terms of the geometry of arrangement of particles in the unit cell.

The unit cell is defined as the smallest repeating unit having the full symmetry of the crystal structure. The geometry of the unit cell is defined as a parallelepiped, providing six lattice parameters taken as the lengths of the cell edges (a, b, c) and the angles between them ($\hat{I}_{\pm} \dots$)

Crystal structure - Wikipedia

This review represents an attempt to summarize literature data on thermal decomposition of ammonium perchlorate. The mechanism of thermal decomposition and various factors which influence on the thermal decomposition of ammonium perchlorate are discussed.

In mathematics and physics, a soliton is a self-reinforcing solitary wave packet that maintains its shape while it propagates at a constant velocity. Solitons are caused by a cancellation of nonlinear and dispersive effects in the medium. (The term "dispersive effects" refers to a property of certain systems where the speed of the waves varies according to frequency.)

Soliton - Wikipedia
