The word down comes from the Old Norse word *dǫnn*, which had the same meaning as its modern equivalent. The down feather is considered to be the most "straightforward" of all feather types. It has a short or vestigial rachis (shaft), few barbs, and barbules that lack hooks. There are three types of down: natal down, body down and powder down.

Rain is liquid water in the form of droplets that have condensed from atmospheric water vapor and then become heavy enough to fall under gravity. Rain is a major component of the water cycle and is responsible for depositing most of the fresh water on the Earth. It provides suitable conditions for many types of ecosystems, as well as water for hydroelectric power plants and crop irrigation.

Update; September 16, 2016: We have been getting some posts documenting the harassment of citizens by local authorities in regards to collecting rain water. I've checked these out to the best of my ability, and found most of them to be somewhat accurate. On this blog I do not intend to focus on taking a political stance

on the legality or morality of rain water harvesting.
