Department of Civil & Environmental Engineering & Earth

School of Earth & Sustainability. Integrating physical, biological, and social perspectives on our changing earth: At Northern Arizona University, we train undergraduate and graduate students to be leading researchers and practitioners in geology, environmental sciences, and sustainability, often collaborating across disciplinary boundaries. Our students spend time learning in the field ...

END OF COURSE EARTH SCIENCE

Earth system science (ESS) is the application of systems science to the Earth sciences. In particular, it considers interactions between the Earth's "spheres" – atmosphere, hydrosphere, cryosphere, geosphere, pedosphere, biosphere, and, even, the magnetosphere – as well as the impact of human societies on these components. At its broadest scale, Earth system science brings together ...

Earth system science - Wikipedia

The stratospheric ozone layer is Earth's "sunscreen" protecting living things from too much ultraviolet radiation from the sun. The emission of ozone depleting substances has been damaging the ozone layer.

7. Dimension 3 DISCIPLINARY CORE IDEAS – EARTH AND SPACE SCIENCES. Earth and space sciences (ESS) investigate processes that operate on Earth and also address its place in the solar system and the galaxy. Thus ESS involve phenomena that range in scale from the unimaginably large to the invisibly small.

ITC is recognized worldwide for achievements in teaching, research and capacity development in the field of geo-information science and earth observation. We educate our students to be professionals, capable of acquiring knowledge and translating this into practical applications for solving real-world problems.
